

Capital Letter Families

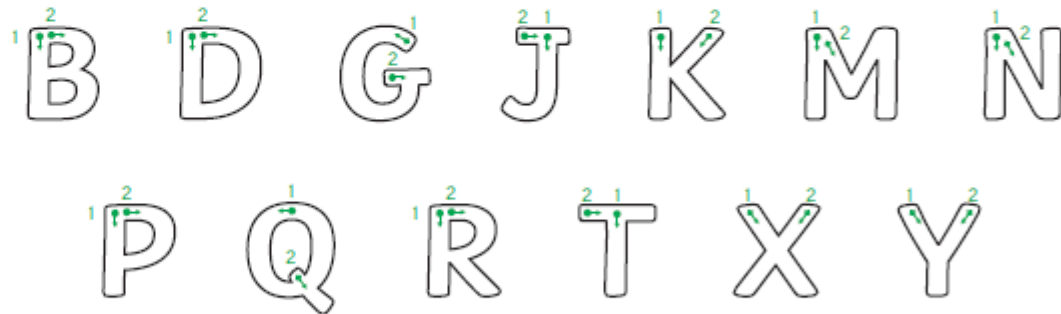

A helping hand at every stage

Capital letters are all formed at the same height and they're not joined to other letters. Although this means the order of the strokes is not as important as when lower case letters are formed, we've still provided some handy formation suggestions.

Capitals without lifting (C, L, O, S, U, V, W, Z)

Capitals with one lift (B, D, G, J, K, M, N, P, Q, R, T, X, Y)

Capitals with two or more lifts (A, E, F, H, I)

Twinkl Tip!

It's important to remember that left-handed children will probably form the capital letters E, F, H, I, J and T differently.
